Overview

The project represents a social network similar to LinkedIn, that is based on professional links between people.

Frontend

General Layout

Each page of the site layout consists of:

- header - includes the site navigation
- main content area
- sidebar, that can be to the left or to the right of the main content area or disappear at all at certain pages.
- footer, that has links to content pages "About Us, "Contact Us", "Terms of Use" and "Privacy Policy".

For the non-logged in visitors of the site the header includes the "Help" and "Share this site" links that lead to the corresponding Page Templates in the admin area. Also includes the search type selector containing the following values (People, Employers, Universities) and the search textfield. There is also a link "Advanced search" that leads to the Browse People/Employers/Universities page where user can input multiple criteria for the search.

For the logged-in users the header includes the 2-level site navigation menu and additional links - Settings, Inbox (to the private messaging), Sign out.

Header is included in all the site pages.

Homepage

The home page of the site consists of the main content area that has a sidebar to the right of it.

The main content area shows the "homepage" template form the Page Templates in the admin area.

Sidebar contains the sign-in form:

Field Name	Field Type	Format	Possible values	Required	Validity check
Email Address	textfield	-	-	*	-
Password	password	-	-	*	-

There is a "reset password" link that sends the password reset confirmation email to the user (using the "reset_password_request" email template) and after the user clicks this link in his email, he receives an additional email (using the new_password email template) with the new password.

Under the sign-in form there is a search form that allows searching for the unclaimed accounts:

Field Name	Field Type	Format	Possible values	Required	Validity check
First Name	textfield	-	-		-
Last Name	textfield	-	-		-
E-Mail Address	textfield	-	-		valid e-mail

After the "Find Your Listing" button is clicked, the search is performed and the user gets redirected to the unclaimed accounts search results page:

Unclaimed Accounts Search Results

The search results are presented in the main content area to the left in a blog-style paginated list with the following attributes:

- First name
- Last name
- Position
- Company (link to the corresponding company profile)
- Location
- Education list

Each entry has a button "This is me" - ведет на страницу с подтверждением (длинный текст) с кнопками согласен или нет. Если согласен - высылается емэйл с ссылкой на подтверждение. При подтверждении на этот же емэйл высылается пароль к этому аккаунту.

The sidebar is located to the right of the content area and contains grouping filters to refine the search:

- All - to cancel all current filtering.
- Industry - expands to the list of all industries found in the search results.
- Company - same as above.
- Location - same as above.
- Tags - all unique tags that are present within each account found in the current search results.

фильтр только на результаты поиска

User Registration

The user registration is performed with a simple form where a visitor can fill the following form to get registered:

Field Name	Field Type	Format	Possible values	Required	Validity check
First Name	textfield	-	-	*	-
Last Name	textfield	-	-	*	-
E-Mail Address	textfield	-	-	*	valid e-mail
Password	password field	-	-	*	-

After the form is completed, the user is redirected to a "thank_you_for_the_registration" template page that is editable in the admin area under the Page Templates section and the newly registered user gets an email with the registration confirmation link. The template of this email "registration_confirmation" is located in the Email Templates section of the admin area. It has several placeholders to address the user data and to supply the confirmation link. It makes sense to supply the password with the email in open format, because it is not verified by a duplicate field during the registration.

After the user has clicked the confirmation link, he sees the "registration_confirmed" page from the page templates. If the registration confirmation link is wrong, the "registration_confirmation_failed" template is shown.

All accounts that have not been confirmed during 3 days after the initial registration are automatically purged from the database.

User Dashboard

This is the main home screen of a logged-in user.

The layout consists of a header, left sidebar and main content area to the right from the sidebar.

The left sidebar contains some quick links to profile information:

- My Profile - consists of the thumbnail of the photo, the active/inactive switch (included in the people directory or not), open to job offers (can/cannot be invited to apply for a job) switch and the total amount of the profile views by other members of the network.
- Profile completion bar - the graphical bar that shows the percentage of the profile completion.
- List of the profile sections - the list of all profile sections with indication of the already completed ones. Each profile section is a link to the user profile, scrolled down to the corresponding section.

The main content column consists of the following blocks:

- My Network - having the amount of people in the contact list and the amount of recommendations.
- New entries in my network - has the last two companies in the network and the last two people appeared the user's network. Each entry is a link to the corresponding profile page. If a person is currently employed at a company, the company name is shown as a link to that company profile.
- My Assessments - shows the list of the taken assessments as links to the assessment information page and the results of the assessment.
- I'm Currently Working On - shows the text that has been added by the user for this section of his profile.
- Network Updates - shows the list of the last 2 profile changes in the contact list of the current user with the exact profile field values that have been changed.

View Profile

The main content area of this page shows all the attributes of a user profile.

If any attribute has no value, it's caption is not shown at all to prevent half-filled appearance of those profiles that are not completely filled.

The list of the general attributes:

- First name
- Last name

- Current Position
- Current Company
- Current Company Industry
- Career Track (multiple)
- Occupation (multiple)
- Location
- Education list (see below)
- Platforms/Technologies
- Industry
- Current position (see below)
- Past positions (see below)
- Currently working on (with the timestamp of last update of this information)
- Two Things I Could Use Help With - shows the two textfields that have been added by the user for this section of his profile.
- XX Connections (a link to the accounts search results list with the uses that are linked with this profile)
- XX Recommendations (an anchor link to the list of recommendations below on the same page).

The education list is a sub-list with the following attributes:

- Degree
- Specialty
- Graduation date
- University Name
- Country

The positions sub-list has the following attributes:

- Company Name
- Position Title

Under this block with general profile attributes there are basic profile textual fields:

- Summary
- Specialties

After that comes the blog-style full list of Experiences of this user, listing all the positions of the user, each one with the following attributes:

- Position Title
- Company Name (link to the company profile)
- Industry of the company
- Working period - from-to
- Description
- X Project Descriptions (opens a small pop-over with the list of the project names each one leading to the corresponding project description page)
- X Connections (leads to the list of "Browse People" search results of the people that have ever worked for this company)
- X Recommendations (is an anchor link to the first recommendation for this position below on the same page).

Under the Experiences comes the blog-style full list of Educations each one with the following attributes:

- Degree
- Specialty

- Graduation Date
- University Name

The last list shows the Recommendations with the following attributes for each recommendation:

- Recommendation Text
- Date Created
- User Name that has created the recommendation (links to his profile page)
- Position of the user at the company that has created the recommendation

The recommendations are grouped by position they are associated with. Only first 5 recommendations are shown and if there are more - the link "See more recommendations" appears under these 5, that leads to the "Received Recommendations" Page.

The last block in this area is the "Contact Information" that contains the listing of the following fields:

- Home Phone
- Office Phone
- Mobile Phone
- Skype
- ICQ
- AIM
- GTalk
- Address

The sidebar to the right has the following blocks:

Quick Info and Links block, that has the following information:

- Active job seeker - this inscription is shown if the user has checked the active job seeker checkbox at the "Edit Profile" page.
- Experience - the amount of years and months that the user has been working, summed up from his job positions.
- Assessments taken - lists the assessments with result for each of them
- Connect with %First Name% - a link to the "Add Contact" page with the already pre-filled contact field

User connections block with the following information:

- The blog-style list of the three latest direct user's friends with the following attributes: First Name, Position, Company. After this list comes a link "See all connections" that leads to the search results list with all the user's friends.
- "Viewers of this profile also viewed" block that lists users with the same attributes as the above connections list.

Edit Profile

The "Edit Profile" page for the user looks similar to the "View Profile" page, except that the main content area has "edit" links near the information blocks that can be edited with special separated forms, according to the category of the information.

The right sidebar contains one single block with the following settings:

- "Set Password" textfield with the "Save Password" button that changes the user password to the given

one immediately.
- "Take Assessment" link that leads to the "Take New Assessments" page.
- "Add Contact", leading to the "Add Contacts" page.
- "Import Contacts", leading to the "Import Contacts" page.
- "Active Job Seeker" switch that turns on the "ACTIVE Job Seeker" inscription on the profile page of this user.

Basic Information

This page has the following form:

Field Name	Field Type	Format	Possible values	Required	Validity check
First Name	textfield	-	-	*	-
Last Name	textfield	-	-	*	-
Former/Maiden Name	textfield	-	-	-	-
Display Name	textfield	-	-	-	-
Professional Headline	textfield	-	-	*	-
Industry	multiselect	-	pre-defined in the system	*	-
Career Track	multiselect	-	pre-defined in the system	*	-
Occupation	multiselect	-	pre-defined in the system	*	-
Platforms, Technologies	textfield	-	-	-	-
Currently working on	textfield	-	-	-	-
2 Things I Could Use Help With	2 textfields	-	-	-	-
Location	textfield	-	-	*	-
Summary	textarea	-	-	-	-
Specialties	textarea	-	-	-	-

There are 2 buttons under the form:

- "Save Changes" - leads back to the main "Edit Profile" page saving changes.
- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes.

Contact Information

This page has the following form:

Field Name	Field Type	Format	Possible values	Required	Validity check
Phone Number	textfield	-	-	-	-
Phone Type	select	-	Home, Office, Mobile	-	-
IM	textfield	-	-	-	-
IM Type	select	-	Skype, ICQ, AIM, GTalk, Address	-	-

Each time a "Phone Number" field is focused out and is non-empty, another set of "Phone Number" and "Phone Type" fields appears under the initial two ones to allow adding multiple phones.

The same applies for the IM fields.

There are 2 buttons under the form:

- "Save Changes" - leads back to the main "Edit Profile" page saving changes.

- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes.

Edit Photo

This page shows the thumbnail of the current uploaded photo, clickable to show a pop-over with the full-sized photo.

There is a file select field to upload a file that can be a JPG, GIF or PNG file (File size limit is 1 MB).

Two buttons finish up this page:

- "Add Photo" - If there is already a photo - a javascript confirmation asks if the user really wants to replace the existing photo.
- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes.

Add Position

This page allows adding working positions to the profile. If an "edit" link of an existing position has been clicked on the Edit Profile page, then the form is already pre-filled with corresponding values.

Field Name	Field Type	Format	Possible values	Required	Validity check
Company Name	textfield	-	-	*	-
Title	textfield	-	-	*	-
I currently work here	checkbox	-	-	-	-
Start Year	select	-	1930-now descending	*	-
Start Month	select	-	1-12 ascending	*	-
End Year	select	-	1930-now descending	*	-
End Month	select	-	1-12 ascending	*	-
Description	textarea	-	-	*	-

There are 2 buttons under the form:

- "Save Changes" - leads back to the main "Edit Profile" page saving changes.
- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes.

If the "I currently work here" checkbox is checked, then the End-* date fields are deactivated on the fly.

If there is already a position that has the "I currently work here" checkbox checked, then the checkbox field in all other positions is exchanged with an inscription "You are currently working at %company_name% as %position%.".

Add Education

This page allows adding educations to the profile. If an "edit" link of an existing education has been clicked on the Edit Profile page, then the form is already pre-filled with corresponding values.

Field Name	Field Type	Format	Possible values	Required	Validity check
Country	select	-	Standard world countries list	*	-
India State	select	-	List of India states	*	-
University	textfield	-	-	*	-

India University	Select	-	list of pre-defined India universities in the system	*	-
Degree	Select	-	B.E., M.E.	*	-
Start Year	select	-	1930-now descending	*	-
Start Month	select	-	1-12 ascending	*	-
Activities	textarea	-	-	*	-
Additional Info	textarea	-	-	-	-

There are 2 buttons under the form:

- "Add Education/Save Changes" (in case an existing education has been edited) - leads back to the main "Edit Profile" page, saving changes.
- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes.

If the user select India in the "Country" select, then the text field "University" is replaced with the "India University" select. Otherwise only the "University" textfield is shown.

The field "India State" is also shown only if the "Country" India is selected.

Add Project Description

This page allows adding project description to a working position using the following form:

Field Name	Field Type	Format	Possible values	Required	Validity check
Customer Name	textfield	-	-	*	-
Project Title	textfield	-	-	*	-
Location	radio	-	Onsite, Offsite	*	-
Site URL	textfield	-	-	* if the Location Radio is "Onsite"	-
Duration Start Year	select	-	1930-now descending	*	-
Duration Start Month	select	-	1-12 ascending	*	-
Duration End Year	select	-	1930-now descending	*	-
Duration End Month	select	-	1-12 ascending	*	-
Team Size	textfield	-	-	*	Positive integer
Description	textarea	-	-	*	-
Your Role	textarea	-	-	*	-
Skills Used	textarea	-	-	*	-

- "Add Project Description/Save Changes" (in case an existing project has been edited) - leads back to the main "Edit Profile" page, saving changes.
- "Back to Edit Profile" - leads back to the main "Edit Profile" page ignoring the changes

Contacts

This is the part of the frontend that allows management of the user's contacts.

All Contacts

This page consists of a narrow sidebar to the left of the main content area that contains the contacts filter:

- All - to cancel all current filtering
- Industry - expands to the list of all industries found in the search results
- Company - same as above
- Location - same as above
- Tags - all unique tags that are present within each account at the current list of contacts.

The main content area is split into 2 columns. The left one has the contact scrollable blog-style full list with the following attributes:

- Thumbnail of the user's photo
- First Name
- Last Name
- Current Position
- Current Company
- Amount of his contacts (if the amount is more than 200, then "200+" is shown)
- tekwillsocnet status (Connected, Not connected, Invite Link)

This list contains not only the contacts that have been explicitly added by the current user to his list of contacts, but also:

- all users working or that have been working at the companies where the user has been working or currently works at.
- all unclaimed accounts working or that have been working at the companies where the user has been working or currently works at.

If the contact is an unclaimed user account, then his tekwillsocnet status is "Not connected", accompanied with an "Invite" link that leads to the "Invite Contact" page with the email address already pre-filled in the textarea.

Under the list of the users there is an Info Box that shows the information about the currently focused user in the list with the following attributes:

- First Name
- Last Name
- Tags with the link to edit tags. The link is replaced with a textfield where the tags are listed comma-separated.
- Company
- tekwillsocnet status
- Email
- Amount of his connections
- Send message link that leads to the "Send Message" page.
- "Edit Details" link - opens a small popup with a textarea that shows the additional free text information that is associated with this contact. This is a private information that is visible only to the contact list owner.
- "Remove from contacts" link - this link is shown only if the contact has been added manually and is not a workplace-linked contact. After a javascript confirmation the contact is removed from the list.

To the right from the contact list and the contact info block there is the Asterisq visualization plugin that shows the links between contacts starting from the currently selected contact.

Add Contact

This page represents a form that has to be filled to add a contact to the contact list of the current user. This page can be accessed using the "Connect with %First Name%" link at the user's profile. It lists contact's First and Last Names at the top, followed by the form:

Field Name	Field Type	Format	Possible values	Required	Validity check
How do you know this contact?	select	-	see below	*	-
Include a personal note	textfield	-	-	-	-

The possible values of the "How do you know this contact?" select:

- Colleague - this option is accompanied with an additional select that is filled with the companies that are in common between the current user and the user being added.
- Classmate
- We’ve done business together
- Friend
- Other

The form is finished up with two buttons:

- "Add Contact", leading one step history back to the originating page and adding the contact to the contacts list.
- "Cancel", leading one step history back to the originating page.

If the "Include a personal note" textarea is not empty, it's content is sent out as a personal message to the user being added.

The contact establishment is one-sided, non-reciprocal. This means that the contact being added is only shown at the user's contact list, but the adding user is not shown in the contact list of the user being added. This should help avoiding unwanted contacts.

Import Contacts

This page consists of two blocks in the main content area.

The first one allows entering an email hosted at one of the following email providers:

- Hotmail.com
- Gmail.com
- Yahoo.com
- Rediffmail.com

Each of these has an API that will allow remote logging in and export of the list of the emails from the contact list via an API call.

Each of these emails are matched to the emails of the current user database and the database of the unclaimed users and all matches are presented in a blog-style full list having the same attributes that the "Browse People" list. Each entry in that list is clickable and opens the corresponding profile page.

The second block at this page allows inviting people to the tekwillsocnet site. It consists of a textarea, where a comma-separated list of email addresses can be entered and each of these emails will receive an email using the "site_invitation" template from the email templates page in the Admin area.

Assessments

This part of the frontend allows assessment management to the user.

My Assessments

This page lists the already taken assessments in a table-style full list with the following attributes:

- ID
- Title
- Category
- Score
- Date Taken
- Visibility (radio button with 2 values: Public, Private)

Take New Assessments

This page lists the not taken assessments in a table-style full list with the following attributes:

- ID
- Title
- Category
- Qualified Candidates - amount of the users that have already successfully taken the assessment, linking to the "Browse People" list.
- "Take Assessment" link with the "Go" caption, leading to the Assessment Details page.

Assessment Details

This page lists the assessment details using the following attributes:

- ID
- Assessment Name
- Syllabus of the Assessment
- Duration
- Number of questions (descriptive text)
- Number of user that have taken this assessment
- Number of user that have qualified in this assessment
- Average score of those who qualified

The "Start Assessment" button leads to the "Take Assessment" page.

Recommendations

This part of the frontend allows management of the recommendations that he user has already received and requesting new ones.

Received Recommendations

This page lists the already received recommendations in the same way they are shown at the "User Profile" page.

For the user that is viewing his own recommendations there is an additional checkbox near each entry - "Show this in my profile" that is checked by default.

There are two buttons at the end of this list:

- "Save Changes" that reloads the same page with the new viewing settings
- "Cancel button" that resets the checkboxes to their initial values

Request Recommendations

This is a form that allows requesting recommendations from other people in the system:

pre-filled with "Can you endorse me?"

Field Name	Field Type	Format	Possible values	Required	Validity check
Position	select	-	list of all positions, current and past of the user	*	-
Connections	select	-	list of all people linked with the user according to the position selected above	*	-
Subject	textfield	-	-	*	-
Message	textarea	-	-	*	-

The form is ended up with two buttons:

- "Send Request" - sends the recommendation request to the selected user using the "recommendation_request" template configured in the "Email and Message templates" part of the admin area.
- "Cancel" - resets the form fields.

The receiving user gets this message into his messaging inbox.

Directory

This part of the frontend allows browsing of the People, Employers and Universities

Browse People

This page represents a table-style paginated list of all users present in the system, both registered and unclaimed accounts with the following attributes:

- First Name (link to the profile)
- Last Name (link to the profile)
- Position
- Career Track
- Location
- Specialty (first 255 chars)

The list can be filtered using the following input fields:

- Industry - a select of all the available industries in the system

- Location - a textfield with like-based substring search of the locations
- Career Track - a select that lists all the available career tracks in the system
- Keyword - a textfield that allows searching of the substrings in all of the attributes of the user containing free text.

Browse Employers

This page represents a table-style paginated list of all employers present in the system with the following attributes:

- Company Name
- Company Website
- Industry
- Location
- No of Employees
- Annual Sales
- Specialty

The list can be filtered using the following input fields:

- Industry - a select of all the available industries in the system
- Location - a textfield with like-based substring search of the locations
- Specialty - a select of all distinct company specialties present in the system
- Number of Employees - a select with the following values: 1-10, 11-50, 50-200, 200+
- Annual Sales - a select with the following values: 10 000 - 50 000, 51 000 - 100 000, 101 000 - 1 000 000, 1 000 000+
- Name or Keyword - a textfield that allows searching of the substrings in all of the attributes of the employer containing free text.

Employer Page

This page lists all the information about a certain employer.

It has a central main content area and sidebar to the right.

The main content area begins with the main company info block with the following attributes:

- Company Name
- Number of Employees
- Website URL
- Address (Headquarters)
- Industry
- Service Areas
- Summary

After that comes a tile-styled paginated list of the present employees of this company - the users that have this company as the employer of their current position. Each of the users is presented with the following attributes:

- Thumbnail of his photo
- First Name
- Last Name
- Position

This list is followed by the list of the past employees of this company - the users that have this company as the employer for one of their past positions. The attributes are the same.

The right sidebar of this page begins with the list of people in the current user's network that are currently working with this company. The list is blog-style, limited to only first 4 results and each entry has the same attributes as the entries from the employees list in the main content area, having additionally the Tier position - 1st, 2nd, 3d - this is the level of the "friendship" level to the current user - 1st if they know each other personally, 2nd if they know each other via another person, and further on 3d, 4th... The list is followed by a link "See all XX connections" that leads to the "Browse People" search results list with all current employees of this company.

The right sidebar is finished up with the "%Company Name% Network" block that has the following inscriptions:

- XXX Connections, where XXX is the amount of all people linked in any way with this company and it is a link to the "Browse People" search results list with all of them.
- XX Recommendations - this link leads to the page listing recommendations of users for this company. At the end of the list there is a "Leave Recommendation" form that allows leaving additional recommendation to this company. The attributes of the recommendations are the same as those for a user except that there is a "Relation" select of the recommending user to the company having the following possible values: "Current Employee", "Past Employee", "Client", "Vendor".

Browse Universities

This page represents a table-style paginated list of all universities present in the system with the following attributes:

- University Name
- University Website
- Address
- Pin code (India postal code)
- State
- Location

The list can be filtered using the following input fields:

- State - a select of all the available states in the system
- Location - a textfield with like-based substring search of the locations
- Name or Keyword - a textfield that allows searching of the substrings in all of the attributes of the university containing free text.

Backend

This part of the system is secured with the admin login and password and allows control of the system settings and management of the data.

Static Data

List of India states:

```
Andhra Pradesh
```

```
Arunachal Pradesh
Assam
Bihar
Chhattisgarh
Chandigarh
Delhi
Goa
Gujarat
Haryana
Himachal Pradesh
Jammu & Kashmir
Jharkand
Karnataka
Kerala
Madhya Pradesh
Maharashtra
Manipur
Meghalaya
Mizoram
Nagaland
Orissa
Punjab
Puducherry / Pondicherry
Rajasthan
Sikkim
Tamil Nadu
Tripura
Uttarakhand / Uttaranchal
Uttar Pradesh
West Bengal
```

Reference Data

This part of the admin area allows editing of the data that is available for the user use in form of select fields, like industries and others.

Industries

The all available industries in the system are presented in a paginated table-style list with a search filter. Each record can be edited and deleted. Under the list there is a link to add a new record.

Career Track

Same as above

Occupation

Same as above

Assessments

This part of the system allows editing assessments and their categories

Categories

The all available assessment categories in the system are presented in a paginated table-style list with a search filter. Each record can be edited and deleted. Under the list there is a link to add a new record.

Employers

The all available industries in the system are presented in a paginated table-style list with a search filter. Each record is a link to the editing page. Under the list there is a link to add a new record.

The employers can be added/edited using the following form:

Field Name	Field Type	Format	Possible values	Required	Validity check
Name	textfield	-	-	*	-
Website	textfield	-	-	-	-
Industry	select	-	pre-defined in the system	*	-
Location	textfield	-	-	*	-
Number of Employees	textfield	-	-	*	positive integer
Annual Sales	textfield	-	-	*	positive integer
Specialty	textfield	-	-	*	-
Service Areas	textfield	-	-	*	-

Universities

The all available universities in the system are presented in a paginated table-style list with a search filter. Each record is a link to the editing page. Under the list there is a link to add a new record.

The universities can be added/edited using the following form:

Field Name	Field Type	Format	Possible values	Required	Validity check
Name	textfield	-	-	*	-
Website	textfield	-	-	-	-

Page Templates

This part of the admin area contains the page and content block templates. Each of them is presented as a list that leads to the WISIWYG editor upon click.

Email and Message Templates

This part of the admin area contains the email and private message templates. Each of them is presented as a list that leads to the WISIWYG editor upon click. Each template has it's own placeholders that can be used to substitute data in the text with the user/event data.

User Accounts

This part of the admin area allows management of all the users present in the system.

All Users

This page is presented in a table-style paginated list with the following attributes:

- First Name
- Last Name
- Email

Each entry is a link to the form that is filled up with all user data, where it can be changed by the administrator. Each 1:n block of data like Positions, Recommendations can be edited in a separate form on a linked page.

Each user has a "Delete" button that deletes the account and all the linked data cascaded completely out of the system after a javascript confirmation.

The list of users can be filtered according to the user direct attributes.

New Users

Each newly registered account is pushed into the post-moderation queue. The administrator has the opportunity to delete certain accounts. This list is exactly the same list as the one above, but with additional "Delete" and "Approve" checkboxes near each account.

If the "Approve" checkbox has been checked, then the account disappears from the post-moderation queue.

Automatic Mailings

There will be several automatic events when the users will get email messages from the system. The corresponding user-activity based emails are described in the corresponding areas of this project description. Here are time-based mailings that do not require an event or user activity:

- Reminder when the users have not logged in for 4 weeks.
